```

Install Missing Dependencies Manually: If the --fix-broken install command does not resolve the issue, you may need to install the missing dependencies manually. You can do this by running:

sudo apt-get install -f

sudo apt update

sudo apt upgrade

```
(base) rejwana@bioinfo:~/Downloads/RSTUDIO_downlaod$ sudo apt-get install -f

```

Consider Using RStudio from the Repository: Instead of downloading the RStudio package from the website, you can try installing it from the official Ubuntu repositories. Run the following command in the terminal:

sudo apt install rstudio

rstudio

6.

```
(base) rejwana@bioinfo:~/Downloads/RSTUDIO_downlaod$ sudo apt install rstudio
